

PERIMETRAL FENCING SYSTEM

**Solutions for perimeter
barrier security**

Did you know
that Chain
link fence
was originally
thought
for cattle?

LANDSCAPE FRIENDLY !!!

- * Permanent fences**
- * Temporary fences**
- * Pedestrian and vehicular gates**

For industrial, institutional, commercial, residential and entertainment facilities alike.

Welded wire mesh security fence was first developed in Europe where it has almost completely replaced chainlink fence for perimeter barrier security.

Used where cost and appearance are both very important, especially where perimeter distances are very long.

VERSATILE AND ATTRACTIVE

- * Simple and cost effective installation.
- * Turns and step-downs to accommodate the lay of the land.
- * Swing and slide gates available.
- * Strong, sturdy and durable.

SECURE AND LONG LASTING MATERIALS

- * Heavy duty, gauge 6 welded wire panels.
- * Stronger than chain link which unravels when cut or damaged.
- * Difficult to cut or remove panels.
- * Galvanized nuts and bolts to prevent corrosion.
- * Weather resistant plastic brackets that hold the panels to the posts.

LANDSCAPING HARMONY

- * Unobstructive see-through panels.
- * A large range of colors available.
- * Provide your home or business an upscale.

This decorative wire fence system offers years of long lasting, maintenance free protection. It is easy to install and is unobtrusive when combined with landscaping and natural spaces.
